Q: When order cost on the cost tab in order entry gets updated.

Order cost WILL get updated when an order is invoiced. No matter if the order was invoiced via the shipping window or the import shipping confirmation.

If the order is invoiced from the order entry window the field is not updated.

Cost is not updated for MROs, Parts Pick Tickets, or if the order cost is edited.
It is updated to the current cost (or the specific cost, if applicable).

See related KB0017615 How is the order cost on the Cost tab of order entry determined.

Note: With the feature enabled 'update specific cost of specials' the ORDER cost will reflect the PO COST immediately after entering the PO COST for "S" items (unless it's LOT-COSTED as that functionality supersedes).
