Issue

Commission Cost Changed from Order to Invoice

Error

N/A

Resolution

Depending upon how your system is set to determine Commission Cost, the "Source" of the commission cost may have changed from the time the order was entered to when it was invoiced.

Commission Cost on the Cost Tab of Order Entry is captured at the time items are entered.

For example, if Commission Cost is calculated based upon Moving Average and the item's MAC has changed from the time the item was placed on the order, it will likely be different from the Commission Cost that you find on the resulting invoice.

Another reason is freight was processed with the Order / Shipment and your Commission Rules are set up as such to affect the Commission Cost by the Freight and thus this affects the Commission Cost that is invoiced but will not change the Commission Cost seen in Order Entry.
